PRO1635BDC

The PRO1635BDC units are constructed with heavy-duty solid steel, featuring dual T-handle tubular locks with proprietary anti-vandal measures, including resistance against forced-entry attacks with specially designed access doors and concealed hinges. The Laundry Pass add-value stations are designed to service high-volume traffic with ease through the use of a unique contactless card reader, that enables fast turnaround through RFID technology.

The PRO1635BDC additionally comes with a card dispenser that has a capacity of 200 cards and is built to last with a ribbon-free mechanism.

Each station comes outfitted with a two-line bright readout, showing the current status, and the card balance and amount paid, upon sensing a contactless card. The unit can be managed locally using the included configuration keyboard and display, providing flexible local control for adjusting system configurations, and can be configured with a rear access panel to provide access on the other side of a wall for an office.
